

## Construction Materials Testing Technician I

Join the 2023 team of the first Construction Materials Testing Laboratory in Massachusetts (Concrete Testing Laboratory #001 License). Work onsite at some of the most iconic buildings in New England and in our 5,000 sq. ft. facility in Canton. Be a part of keeping today's buildings safe and healthy for the future. This is a great career opportunity!

### Requirements:

- ACI Concrete Field-Testing Grade 1 certification
- Solid knowledge of the principles and terminology in the Construction Inspection Industry.
- Prior work experience in the Construction Inspection Industry (with references) is a plus.
- High School degree minimum; Associates or Bachelor's degree in Civil Engineering or associated discipline a plus
- Must have a valid driver's license with a clean record and reliable transportation
- Ability to lift 75 lbs., walk/work on uneven surfaces, work outside in various weather conditions and from heights.
- Must be willing to wear attire appropriate with safety regulations. Work boots necessary as per ANSI Z-41. Hard hat, safety vest and safety glasses are provided.
- OSHA-10 preferred

### Qualifications:

- General computer knowledge (MS Word, Excel).
- Ability to keep detailed field notes and record data.
- Ability to read plans and specifications.
- Must be a team player and work well with others.
- Must have good organization skills, the ability to focus on details, and the ability to follow directions, both written and oral.
- Must be punctual and reliable.
- Must have a desire to learn.
- Good communication (listening, speaking, writing) skills
- Clean record with CORI and other background checks.
- Occasional weekend availability, if necessary; must be able to accommodate flexible work hours when necessary.
- Must be able to work independently.

### Benefit package available.

### General Schedule: Monday – Friday

- Overtime potential
- Occasional weekend availability

**Job Type:** Full-time year round or seasonal (May - October)

The Thompson & Lichtner Co. is a woman-owned engineering, testing, and consulting small business (WBE-SDO certified) founded 127 years ago. We perform a broad range of engineering, testing, quality control, advisory, building envelope, and forensic services to the construction industry, particularly in areas of weatherproofing, moisture penetration, and air and water penetration. Our in-house laboratory provides a wide range of routine and specialized services for the quality control of construction materials utilizing test specifications of ASTM, ANSI, Federal, and other national standards-setting organizations.
